

A PREETHAM REDDY

AI / ML | Generative AI | RAG | Python

Bengaluru, India | +91 6361484070 | preethamofficial336@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

AI Engineer specializing in Generative AI and RAG, currently building production RAG pipelines at KenAI Technologies while directing AI coding agents to architect full-stack applications end-to-end. Hands-on across the LLM ecosystem — LangChain, LangGraph, Hugging Face, Gemini, Groq, Cohere, and local models via Ollama — with 1+ year of freelance GenAI delivery and three independently deployed AI projects. Owns the full stack: data pipelines, backend logic, prompt engineering, RAG evaluation, and Docker/Railway deployment.

WORK EXPERIENCE

Software Trainee – AI | KenAI Technologies Private Ltd.

July 2026 – Present

arpreetham@kenai-us.com

- Building the AI Meeting Assistant, an internal meeting-automation platform — RAG-based summarization and retrieval using Python ([GitHub repo](#)).
- Developing the backend for Moritz, a multi-role elder-care companion app, migrating Node.js/Express to Python/FastAPI with asyncpg, auth, and role-based endpoints for Admin, Caretaker, Individual, and Family.

Generative AI Freelancer | BEPEC Solutions

June 2025 – June 2026

Remote

- Delivered GenAI solutions for 3+ client-facing websites spanning document analysis, data extraction, summarization, classification, customer support, information retrieval, code and content generation, and multimodal AI.
- Engineered 50–60 production prompts across these use cases; worked with vector databases and RAG pipelines, including RAG evaluation and fine-tuning, to improve retrieval accuracy for production systems.
- Contributed to UI design for client-facing AI applications.

Experience certificate & recommendation letter available on request.

INTERSHIP

Generative AI Intern | VTU | LEARNERS BYTE ExpertPedia ai

Jan 2026 – May 2026

- Built a RAG-based semantic search module using Sentence Transformers and vector embeddings for document Q&A, applying prompt engineering and NLP techniques; wrote pytest unit tests for functional correctness.
- Worked in an Agile team (stand-ups, sprint retrospectives) on Linux (Ubuntu), using Git/GitHub with feature branching and peer code review.

PROJECTS

AI Doubt Resolution Agent — RAG-Based Q&A Platform

2026

Python, LangChain, LangGraph, Hugging Face, ChromaDB, MySQL, Supabase, Git

- Architected an AI-powered doubt-resolution system using LangChain/LangGraph with a custom multi-step RAG pipeline; designed a normalized MySQL schema and integrated ChromaDB and Supabase (pgvector) for semantic search.

[GitHub repo](#) | [Telegram bot: @AI_Doubt_Solver336_bot](#)

Skin Disease Detection System — Deep Learning Image Classifier

2025

Python, TensorFlow, EfficientNetB1, Scikit-learn, OpenCV, CNN

- Built and fine-tuned a CNN (EfficientNetB1) to classify skin lesions across 7 categories on the 10,015-image HAM10000 dataset, improving validation accuracy from a low-80s baseline to 87%.

[GitHub repo](#)

DataWise AI — AI-Powered Data Cleaning and Analysis Platform

2025 – 2026

Python, Pandas, NumPy, AI Integration, Full-Stack Web Development

- Built a full-stack platform that uses AI to automate data cleaning, validation, and exploratory analysis on user-uploaded datasets, cutting manual preprocessing for nulls, type mismatches, and outliers.

Client project — codebase not publicly shared.

TECHNICAL SKILLS

Languages: Python, SQL (MySQL, PostgreSQL)

Core CS: Data Structures & Algorithms, OOP, Database Management

AI / ML: Generative AI, LLMs, LangChain, LangGraph, RAG, RAG Evaluation, Fine-Tuning, Prompt Engineering, Multimodal AI, Sentence Transformers, ML Model Training, EfficientNetB0/B1, WhisperFlow

LLM APIs & Platforms: Google Gemini (AI Studio), Groq, Hugging Face, Cohere, Ollama (local LLMs)

Databases: MySQL, PostgreSQL, ChromaDB, Vector Databases

Dev Tools & AI Coding Assistants: Git, GitHub, VS Code, GitHub Copilot, Cline, Codex, Blackbox AI, Anaconda, Google Colab

Deployment & DevOps: Docker, Railway, GoDaddy (Domain & Hosting)

UI & Automation: UI Design, n8n, CrewAI, Fiverr (freelance automation delivery)

EDUCATION

Brindavan College of Engineering, Bengaluru

2022 – 2026

Bachelor of Engineering, Information Science and Engineering

BGS PU College

2021 – 2022

Pre-University Course (PUC) – Science

CERTIFICATIONS

GenAI Internship Completion Certificate — VTU-affiliated program (2026) | Python Programming Certification (2024)
